- **Presentation Date:** September 16, 2025
- **Presentation Time:** 10:30 a.m. Eastern Daylight Time (EDT)
- **Location:** [Webcast Link](#)

### About Protalix BioTherapeutics, Inc.

Protalix is a biopharmaceutical company focused on the development and commercialization of recombinant therapeutic proteins expressed through its proprietary plant cell-based expression system, ProCellEx. It is the first company to gain U.S. Food and Drug Administration (FDA) approval of a protein produced through plant cell-based in suspension expression system. This unique expression system represents a new method for developing recombinant proteins in an industrial-scale manner. Protalix has licensed to Pfizer Inc. the worldwide development and commercialization rights to taliglucerase alfa for the treatment of Gaucher disease, Protalix's first product manufactured through ProCellEx, excluding in Brazil, where Protalix retains full rights. Protalix's second product, Elfabrio<sup>®</sup>, was approved by both the FDA and the European Medicines Agency in May 2023.

Protalix has partnered with Chiesi Farmaceutici S.p.A. for the global development and commercialization of Elfabrio. Protalix's development pipeline consists of proprietary versions of recombinant therapeutic proteins that target established pharmaceutical markets, including the following product candidates: PRX-115, a plant cell-expressed recombinant PEGylated uricase for the treatment of uncontrolled gout; PRX-119, a plant cell-expressed long acting DNase I for the treatment of NETs-related diseases; and others.

### Conference Overview and Structure

The Investor Summit is an exclusive virtual event for investors specializing in small and microcap stocks. Attendees will:

- Hear directly from company executives about key strategies and milestones
- Learn from industry experts and thought leaders
- Explore opportunities in the microcap market

This quarter's event emphasizes **undervalued MicroCap companies with strong growth catalysts**, providing investors with a unique platform for discovery and engagement.
