
PROTALIX BIOTHERAPEUTICS

Pioneering solutions to transform the treatment of rare diseases

CORPORATE PRESENTATION

August 2026

Forward-Looking Statements

This presentation contains forward-looking statements that involve risks and uncertainties within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Exchange Act. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based on management's current expectations or plans, and projections for future operating and financial performance, based on assumptions currently believed to be valid. Forward-looking statements can be identified by the use of words such as "anticipate," "believe," "estimate," "expect," "can," "continue," "could," "intend," "may," "plan," "potential," "predict," "project," "should," "will," "would" and other words or phrases of similar import, as they relate to Protalix, its subsidiary, or its management, are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. The forward-looking statements in this presentation include, among other things, statements regarding our cash runway and the commercialization of our products. Forward-looking statements are subject to many risks and uncertainties that could cause our actual results to differ materially from any future results expressed or implied by the forward-looking statements, including, but not limited to, risks related to the commercialization of Elfabrio®; that Elfabrio's revenue, expenses, and costs may not be as expected; Elfabrio's market acceptance, competition, reimbursement, and regulatory actions, including as a result of the boxed warning contained in the U.S. Food and Drug Administration, or FDA, approval received for the product; risks related to the regulatory approval and commercial success of our other product and product candidates, if approved; risks related to our expectations with respect to the potential commercial value of our products and product candidates; failure or delay in the commencement or completion of our preclinical studies and clinical trials, which may be caused by several factors, including: slower than expected rates of patient recruitment; unforeseen safety issues; determination of dosing issues; lack of effectiveness during clinical trials; inability to satisfactorily demonstrate non-inferiority to approved therapies; inability or unwillingness of medical investigators and institutional review boards to follow our clinical protocols; inability to monitor patients adequately during or after treatment; and/or lack of sufficient funding to finance our clinical trials; delays in the approval or potential rejection of any applications we file with the FDA, European Medicines Agency or other health regulatory authorities for our product candidates, and other risks relating to the review process; our ability to manage our relationship with our collaborators, distributors, or partners, including, but not limited to, Pfizer Inc., and Chiesi Global Rare Diseases; and other factors described in our filings with the U.S. Securities and Exchange Commission. In addition, new risk factors and uncertainties may emerge from time to time, and it is not possible to predict all risk factors and uncertainties. Given these uncertainties, investors should not place undue reliance on these forward-looking statements. Except as required by law, Protalix undertakes no obligation to update or revise the information contained in this presentation whether as a result of new information, future events, or circumstances or otherwise.

Third-Party Information

This presentation also contains estimates and other data made by independent parties and Protalix relating to market size and growth and other data related to the industry in which Protalix operates. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. Neither Protalix nor any other person makes any representation as to the accuracy or completeness of such data. In light of the foregoing, you are urged not to rely on any forward-looking statement or third-party data in reaching any conclusion or making any investment decision about any securities of the Company. The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives. We recommend that investors independently evaluate specific investments and strategies.

Experienced leadership team

Dror Bashan

President and CEO

Mr. Bashan has over 20 years of experience in the pharmaceutical industry with roles ranging from business development, marketing, sales and finance, providing him with both cross regional and cross discipline experience and a deep knowledge of the global pharmaceutical and health industries.

GILAD MAMLOK

SVP & CFO

Mr. Mamlok brings 30 yrs experience in healthcare/ technology companies. His has extensive experience in capital markets transactions, mergers and acquisitions and BD. Previously, he served as the CFO of TytoCare and CFO of Sol-Gel Technologies. Earlier, he served in other medical device and technology companies, including Given Imaging for 10 years (acquired by Covidien) and Nice.

Fernando Sallés, PH.D., CLP

Chief Business Officer

Dr. Salles has spent >25 years in senior strategic/BD roles. Most recently as CBO at Kallyope. Previously at IMAB, Teva, Merck, Schering-Plough and Organon. Notable transactions: Acquired phase 2b ready asset, novel obesity target to Novo Nordisk, BioCentury/Bay Helix deal of the year award for IMab - AbbVie >$2B

YARON NAOS

Chief Operating Officer

Mr. Naos has been with Protalix for >20 years. He has a wealth of hands-on experience and knowledge in the field of pharmaceutical development. Previously, he was R&D Product Manager at Dexxon Pharmaceutical Co., one of Israel's largest pharmaceutical companies, where he was responsible for technology transfer from R&D to production

SHOSHI TESSLER, PH.D.

VP, Clinical Dev & Regulatory Affairs

Dr. Tessler has >20yrs experience in the pharma, leading innovative drug development projects, from discovery to market. Previously, she served as VP, R&D of Biosight and of Enzymotec. (currently part of International Flavors & Fragrances Inc.) and as a Project Champion at Innovative R&D, Teva.

ORI KALID, PH.D.

VP of R&D

Dr. Kalid brings >20 years of leadership experience in pharmaceutical R&D. Previously he was co-founder and CEO of Silverskate Bio, as well as co-founder and CEO of Pi Therapeutics. He also served at Hotaru Innovation Partners, PREDIX/EPIX Pharmaceuticals and Karyopharm Therapeutics.

Protalix delivers innovations from concept to market

Proven execution of delivering protein products for rare diseases with a pipeline for the future

Revenue generating

Partnered commercial products

Enzyme replacement therapies (ERTs)[1,2]

ELFABRIO (pegunigalsidase alfa-iwxj)

elelyso™ (taliglucerase alfa) for injection

Chiesi

Pfizer

FIOCRUZ Fundação Oswaldo Cruz

Next phase of the company

PRX-115 best-in-class potential for uncontrolled gout

- Uncontrolled gout has high unmet need
- Potentially differentiated based on Phase 1 data: less frequent dosing, less immunogenicity
- Phase 2 PRX-115 trial actively enrolling (NCT05745727)

Pipeline for the future

- 3-year goal: 5-7 programs spanning discovery to clinic
- Rare disease discovery and development with a focus on renal indications

ProCellEx® Proprietary Discovery Platform

Protein therapeutics: Plant cell-based protein expression

Chemical modifications: PEGylation, others

Drug delivery: Exploring new modalities

ProCellEx® Manufacturing

Commercial Manufacturing

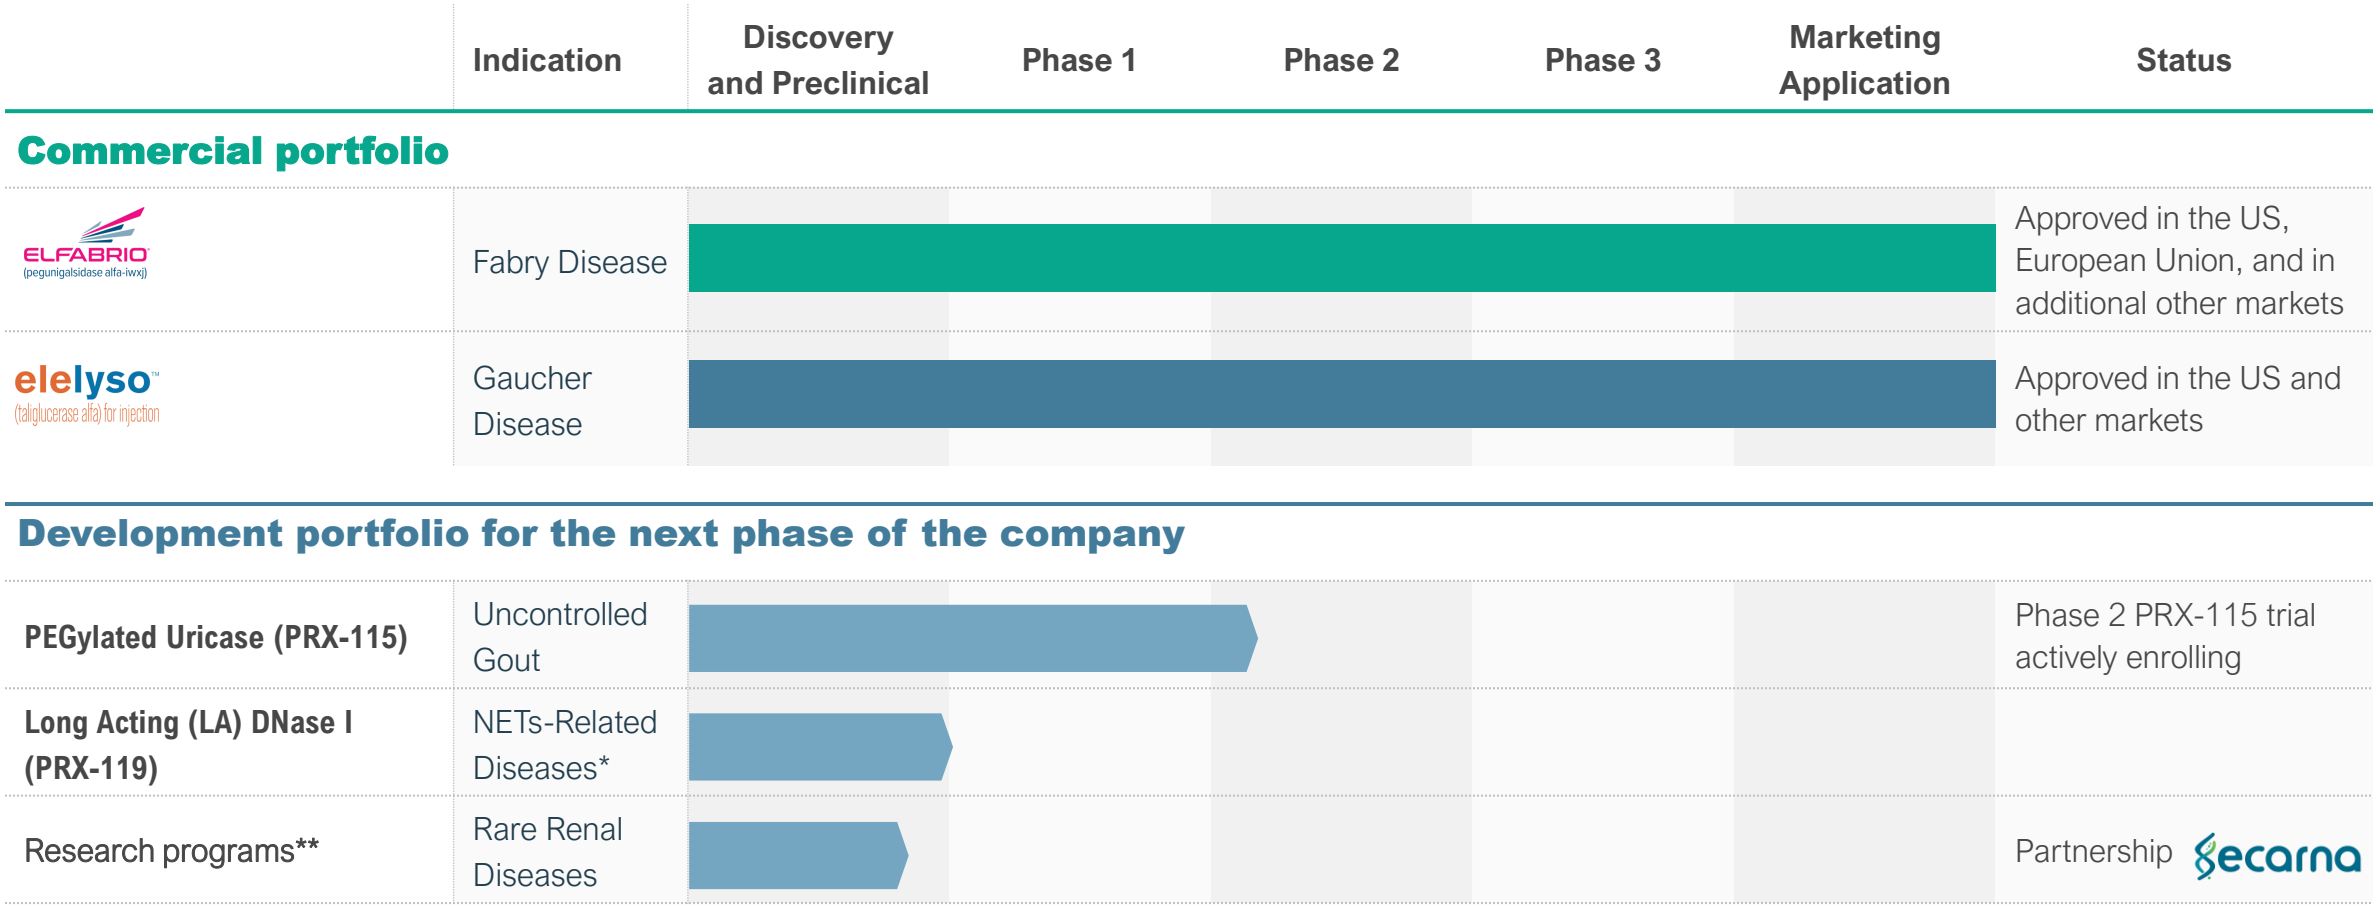
PROTALIX Biotherapeutics

1: Elfabrio has been approved for marketing in the United States, the European Union, and additional markets. Chiesi Global Rare Diseases, a business unit of the Chiesi Group, is our global partner

2: Elelyso is approved in 23 markets. Pfizer Inc. is our global partner, with the exception of Brazil where we partner with Fundação Oswaldo Cruz ("Fiocruz"), an arm of the Brazilian Ministry of Health

Two commercial products and a growing pipeline for the future

Developing recombinant proteins for rare diseases with unmet medical needs



PROTALIX Biotherapeutics

* Neutrophil extracellular traps (NETs)
**Includes internal programs and a collaboration and option agreement with Secarna Pharmaceuticals

Well-capitalized to advance Protalix to the next phase

The Company achieved profitability with a net income of $22.1 million for the first half of 2026

REVENUES

Elfabrio® sales drove revenues from selling goods up to $19.8 million in the second quarter of 2026 (+$4.4 million from Q2 2025); total revenues climbed to $53.6 million, year to date, from $25.8 million for the same period in 2025 (including $25.0M Chiesi milestone from Q1 2026)

CASH & CASH RUNWAY and OUTSTANDING SHARES

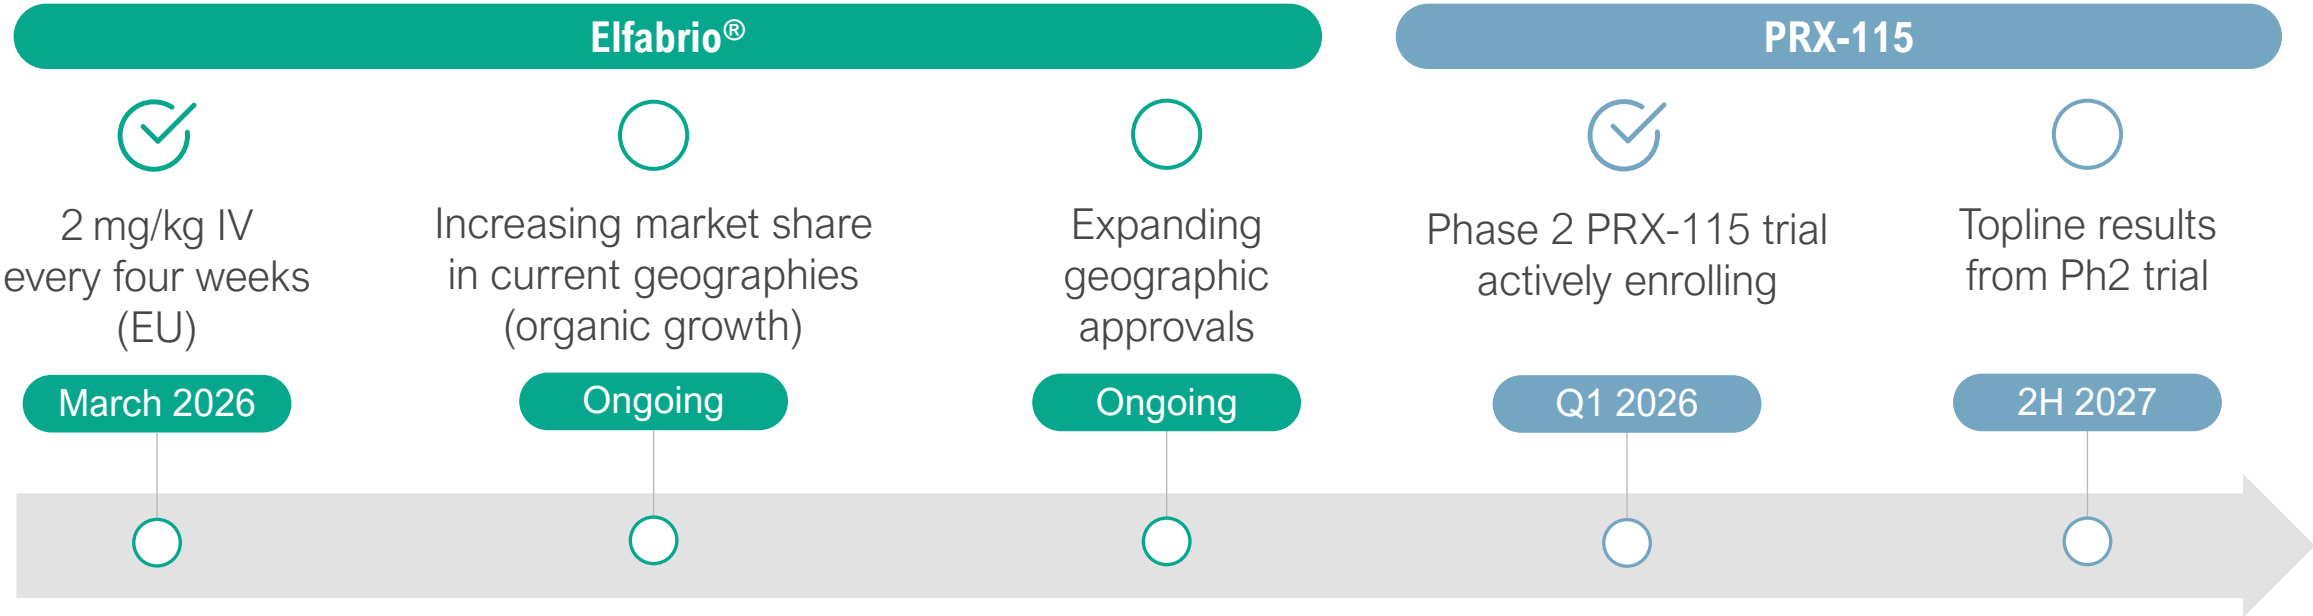
$40.7M (as of: June 30, 2026); no debt no warrants
~80.6M shares of common stock outstanding (August 1, 2026)

DEVELOPMENT PORTFOLIO DRIVES FUTURE GROWTH

PRX-115 recombinant PEGylated uricase product candidate. Best-in-class potential.
Phase 2 PRX-115 trial actively enrolling.

Financial strength to support ongoing operations and pipeline

Key upcoming milestones and catalysts

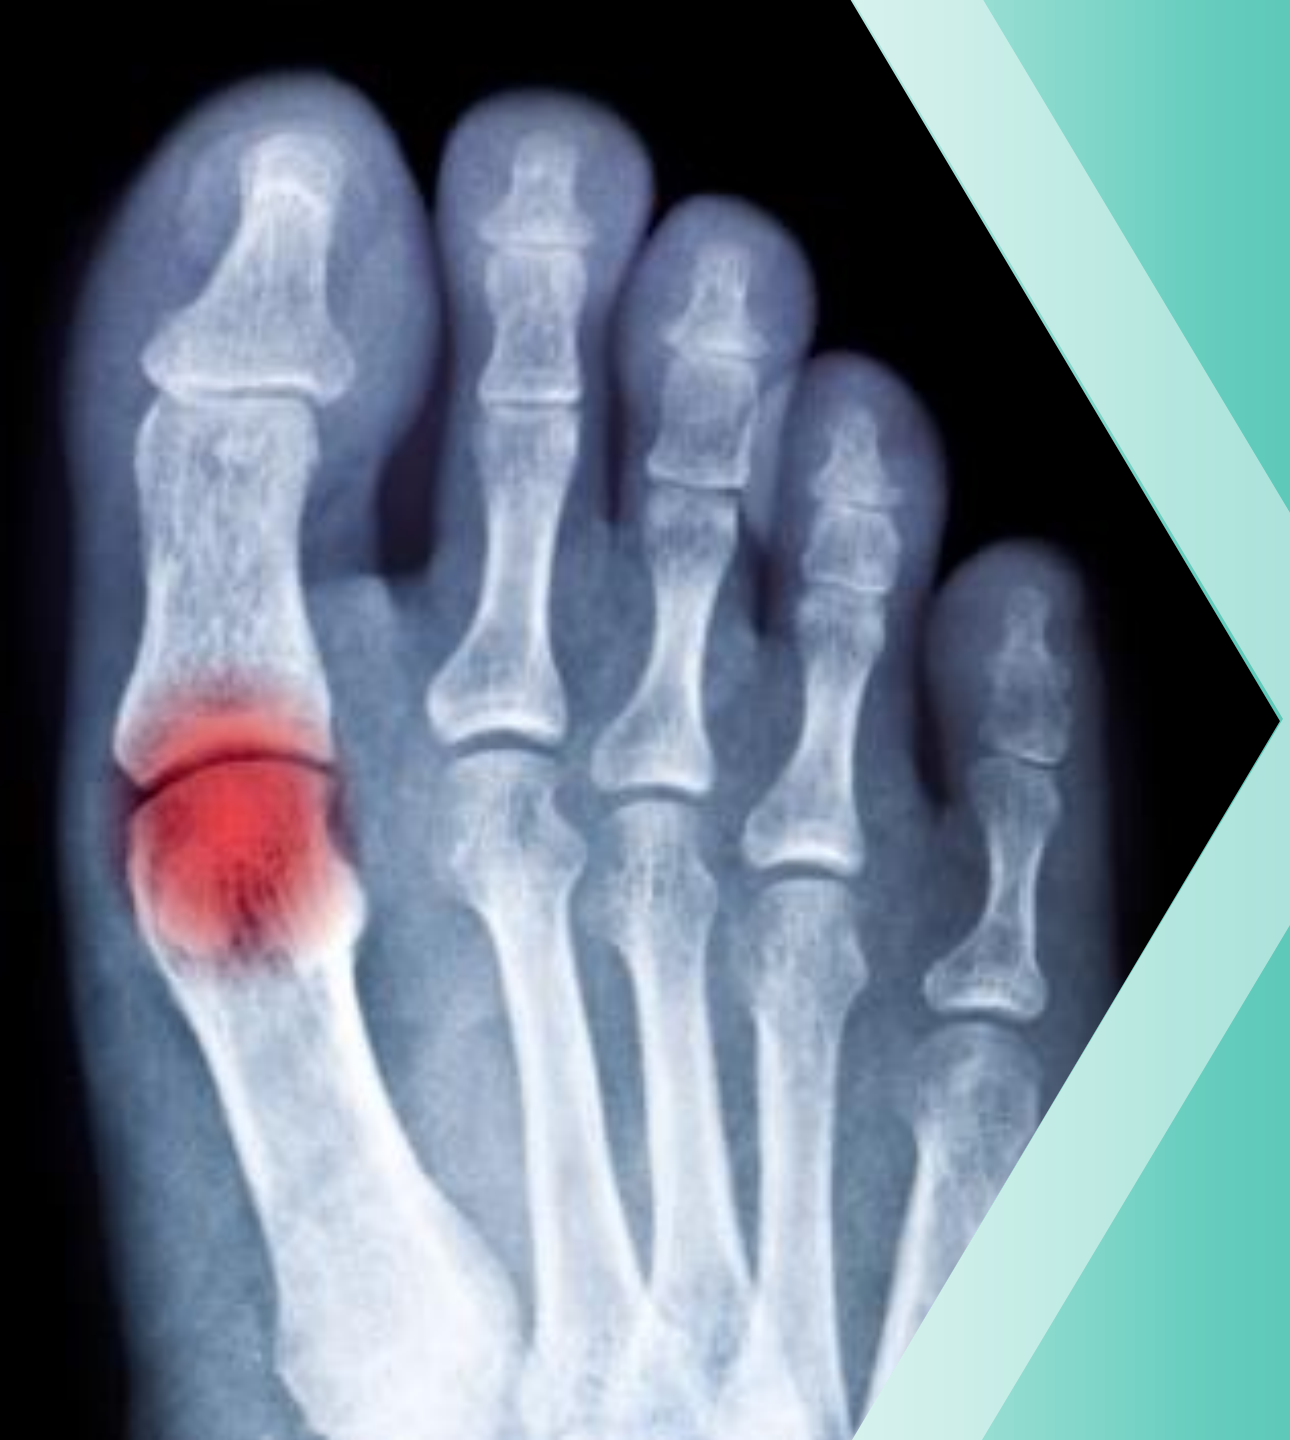


Continued internal R&D pipeline growth

Business development activities in rare renal diseases

3 revenue streams and projected consistent growth in the medium-term

Significant milestone payments expected in mid- and long-term



PROTALIX Biotherapeutics

Phase 2
Actively enrolling

PRX-115 in development for uncontrolled gout

Uncontrolled gout: limited options and disadvantages with current therapy

An unsatisfied market

Gout and uncontrolled gout

- Metabolic disorder characterized by elevated blood urate that causes recurrent inflammatory arthritis and joint damage
- Rheumatologists report that ~25% of their patients have above target urate blood levels which can lead to uncontrolled gout*
- Uncontrolled gout is a severe disease with high morbidity and high pain with low quality of life

Current uricase therapy for uncontrolled gout

Krystexxa® (pegloticase) with/without methotrexate (MTX)

- Net sales of Krystexxa reached $1.3B (2025)

NASP (nano encapsulated sirolimus plus pegadricase)
Initial PDUFA Date – June 2026

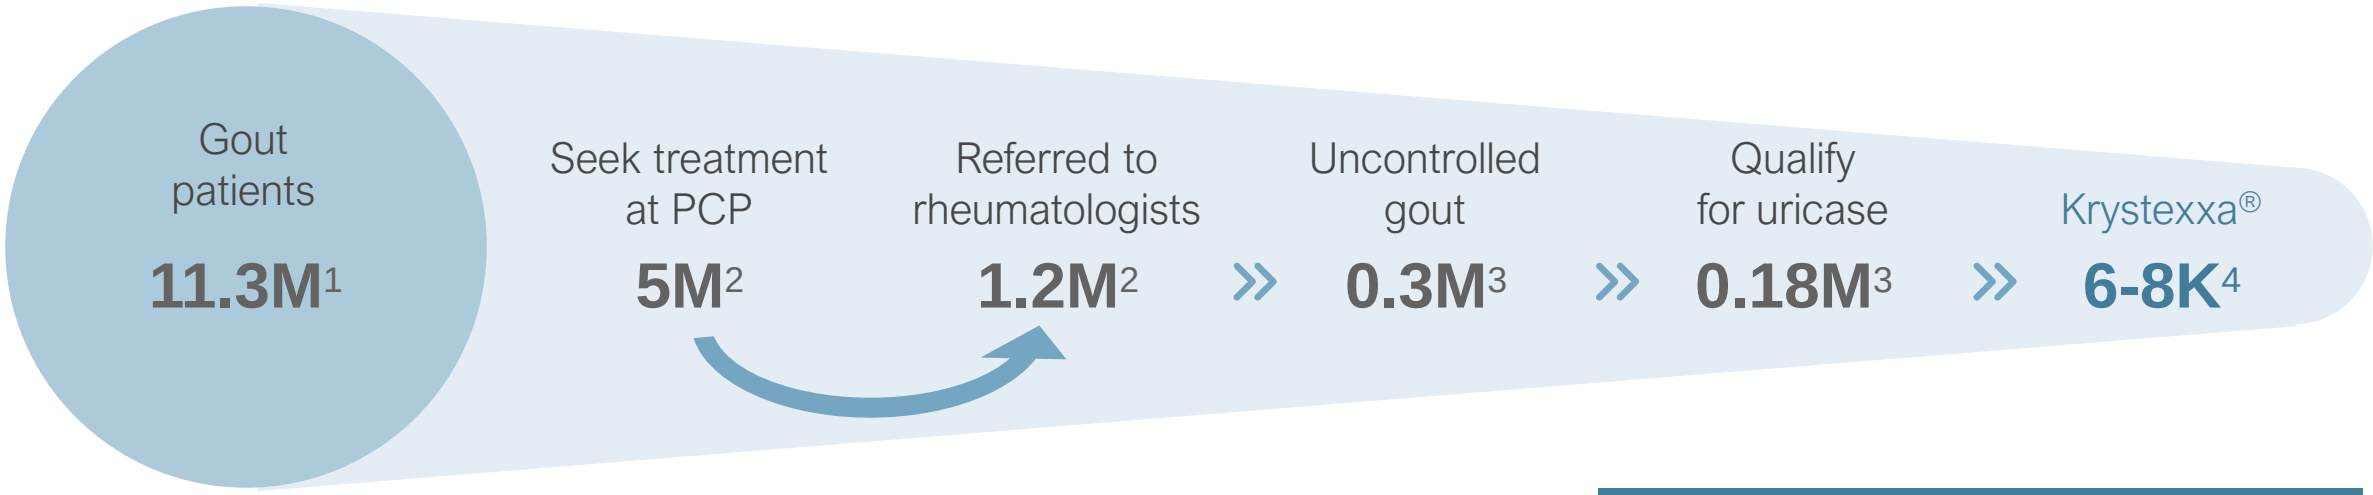
Significant unmet needs and challenges

- Infusion logistics and burden
- Immunogenicity and loss of efficacy
- Safety concerns
- Clinical inertia and physician familiarity
- Costs and insurance coverage

PROTALIX Biotherapeutics

*Internal research

The US Gout Market



Treatments

Uricase

URAT1s**,†

allopurinol, febuxostat†

The market is poised to expand significantly as newer therapies and competitors enter and further expand disease awareness and reduce clinical inertia

A **differentiated best-in-class uricase like PRX-115** is poised to increase the market further and capture significant market share

Sales of Krystexxa are $1.3B (2025), yet less than 5% who qualify for uricase are currently treated

PROTALIX Biotherapeutics

1. Global Data – Aug 2025; 2. ACR Open Rheumatology Vol. 2 March 2020; 3. proprietary PRX Mkt Research 75 Rheums; 4. Internal estimates proprietary calculation ** Urate transporter 1 inhibitor; none currently available in the US
† Neither the xanthine oxidase inhibitors nor the URAT1s should be co-administered with uricases

PRX-115 Phase 1 single ascending dose study: encouraging data supports Phase 2

Recombinant PEGylated uricase enzyme produced via ProCellEx®

Study Scheme

Primary Endpoint: Safety and tolerability

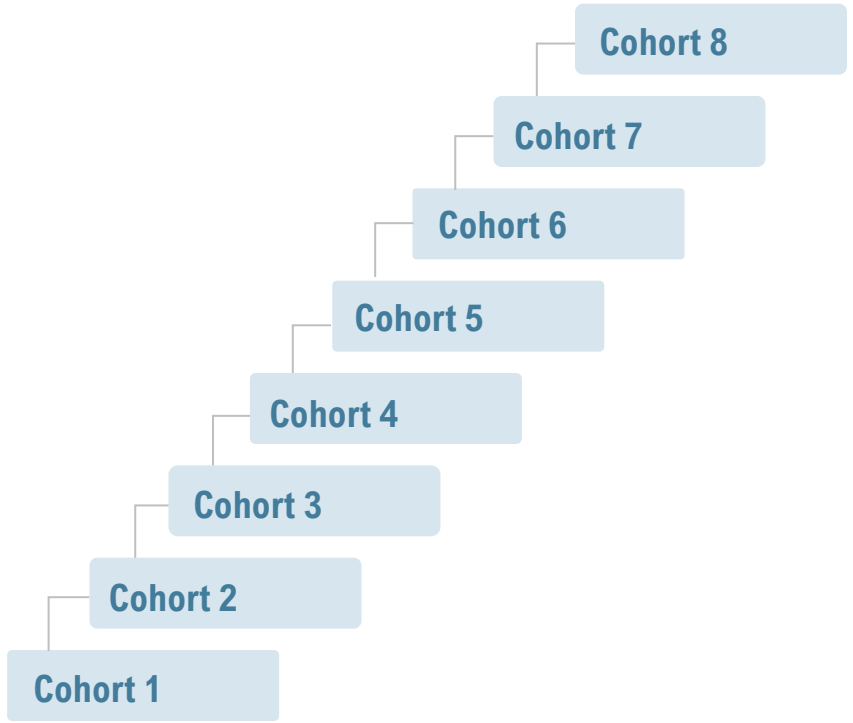
Secondary Endpoints: PK, PD (uric acid levels)

Subjects with elevated uric acid

N = 8 per cohort (6 PRX-115 + 2 placebo in each cohort)

Dose escalation meeting by blinded Safety Monitoring Committee (SMC) following completion of each cohort

For subject safety, each cohort/dose level started at least 7 days from the dosing of the previous cohort

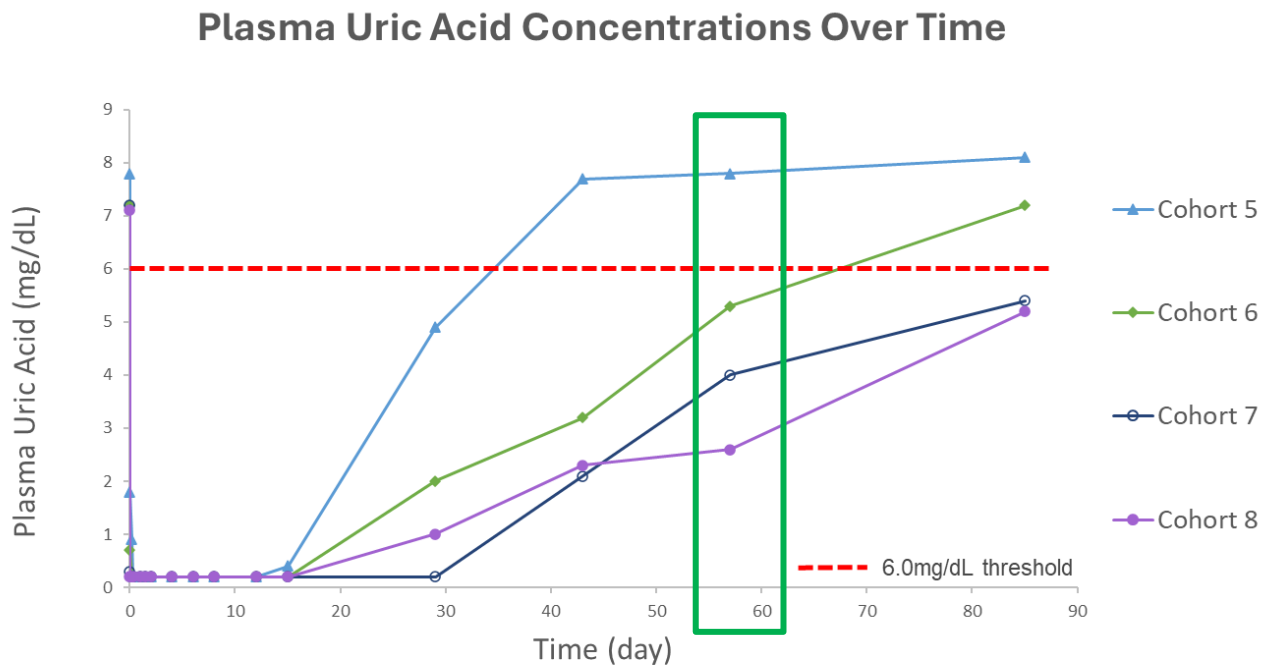


PRX-115 best in class potential for uncontrolled gout

Addresses an important unmet medical need

PRX-115 Phase 1 outcome

- Favorable tolerability profile
- Ability to reduce uric acid levels rapidly and maintain below 6.0 mg/dL for greater than 8 weeks



Phase 2 RELEASE study

- Actively enrolling (NCT07280156)
- Trial in uncontrolled gout patients
- Fixed 36 mg dose across extended dosing intervals with and without methotrexate (MTX)
- Top-line results anticipated in 2H 2027

Targeted Phase 2 differentiation(s)

- IV infusion every 4 weeks without requirement for co-administration of the immunomodulator MTX
- Improved dosing interval
  - IV infusion every 6 or 8 weeks in the presence of MTX
- Favorable safety and immunogenicity profile

PROTALIX Biotherapeutics

PRX-115 Phase 2 double blind placebo-controlled study design: actively enrolling

Fixed Dose at Various Dosing Intervals

Patient Population: uncontrolled gout

Primary Endpoint: proportion of patients who achieve a reduction in serum uric acid (sUA) to <6.0 mg/dL for at least 80% of the time during Month 6

Secondary Endpoints: additional uric acid parameters, safety, and immunogenicity

Exploratory Endpoints: tophi, flares, swollen & tender joints, quality of life (QoL), pharmacokinetics (PK)

PRX-115 IV Dosing Regimens and Treatment Arms

Arm A*	**every 4 weeks w/o MTX**	N=30
Arm B	**every 4 weeks + MTX**	N=30
Arm C	**every 6 weeks + MTX**	N=30
Arm D*	**every 8 weeks + MTX**	N=30
Arm E	**Placebo**	N=30

* Key differentiators no MTX (A); 8-wk dosing interval (D)

MTX = Methotrexate

PROTALIX Biotherapeutics

Commercial products

Reliably partnered and delivering revenue

Two commercial products sustaining future growth

Enzyme replacement therapies (ERTs) continue to be the gold standard treatment for lysosomal storage diseases

Fabry disease

ELFABRIO® (pegunigalsidase alfa-iwxj)

Rare X-linked disorder (~1/40,000-60,000 males WW) with progressive renal, cardiac, and neurological burden

Commercialization Partner: Chiesi

Approved in US, EU plus additional markets

Commercial Potential

- Fabry Market: ~$2.2B[1] (2025) expected to reach ~$3.2B (2031)
- Elfabrio® poised to capture significant global market share (15% to 20%)
- Protalix royalties per year from Chiesi (15% to 35% ex-US, 15% to 40% US)
- Significant milestone payments potential in mid- and long-term

Gaucher disease

elelyso™ (taliglucerase alfa) for injection

Rare autosomal recessive disorder (~1/40,000 WW) with systemic visceral and skeletal disease-causing disability and organ dysfunction

Commercialization Partners: Pfizer; FIOCRUZ Fundação Oswaldo Cruz

Approved in 23 markets

Worldwide (ex-Brazil) license with Pfizer

Brazil collaboration with Fundação Oswaldo Cruz

- Market share in Brazil: ~25%
- Sales ~$11M in Brazil (FY2025)

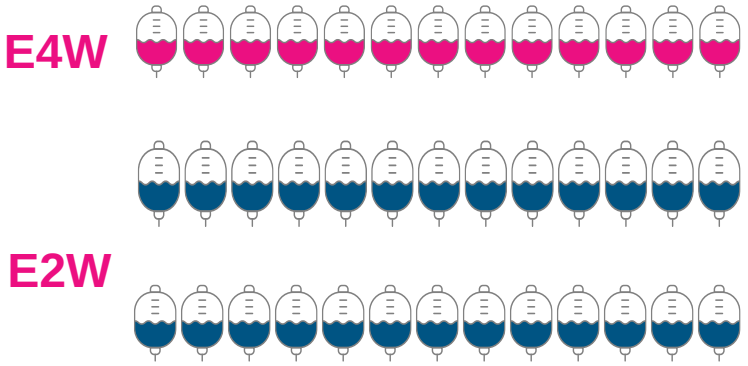
PROTALIX Biotherapeutics

1 GlobalData extracted (forecast) March 2026

EC and MHRA approve every-4-weeks (E4W) Elfabrio® dosing for adults with Fabry disease[1]

Now the only ERT in the EU offering an E4W option, reducing treatment burden from standard bi-weekly regimens

Infusions per year Elfabrio®



Quality-of-life improvement for Fabry patients in the EU

50% reduction
in infusion days

E4W dosing clinically validated

ELFABRIO (pegunigalsidase alfa-iwxj)

BRIGHT study
- E4W maintained clinical and renal outcomes in stable patients

Long-term extension data
- Confirmed durable response and
- Comparable safety profile

PopPK + exposure-response analysis
- Support for E4W regimen

Regulatory milestone payment of $25 million received from Chiesi

PROTALIX Biotherapeutics

1: Medicines & Healthcare products Regulatory Agency (MHRA) in the United Kingdom and the European Commission (EC) approved a novel 2mg/kg every-4-weeks (E4W) dosing regimen for Elfabrio in adults with Fabry disease who are stable on an enzyme replacement therapy (ERT); FDA-approved dosing regimen for Elfabrio in the United States remains 1mg/kg every 2 weeks; EU=European Union

Fabry disease competitive landscape

~$2.2B market (2025) expected to reach over ~$3.2B (2031), CAGR of 6.4%[1]

Product Name	Fabrazyme®	Replagal®	Galafold®	Elfabrio®
Parent Company	sanofi	Takeda	Amicus Therapeutics	PROTALIX Biotherapeutics / Chiesi
Mechanism	ERT	ERT	Pharmacological chaperone	ERT longer half-life (pegylated)
Approved for	Adults & pediatric patients 2+ years (US). Adults, children and adolescents aged 8+ years (EU)	Adults, children and adolescents aged 7+ years (EU only)	Accelerated approval in adults (US). Adults and adolescents 12+ years (EU)	Adults (US, EU and others). Global pediatric study ongoing
Dosing	1 mg/kg every 2 weeks	0.2 mg/kg every 2 weeks	123 mg every other day	1 mg/kg every 2 weeks **2 mg/kg every 4 weeks (EU)**
Administration mode	Intravenous infusions	Intravenous infusions	Oral	Intravenous infusions
Approval Date	Full approval in 2021; accelerated approval in 2003 (US); 2001 (EU)	Not approved in US; 2001 (EU)	2018 (US); 2016 (EU)	2023 (US and EU)

Elfabrio is poised to capture meaningful global market share (15% to 20%)

PROTALIX Biotherapeutics

1 Source global data extracted Aug 2025

Commitment and execution from global partnership with Chiesi

Committed Global Partner [1]

- International research-focused biopharmaceutical group with sales of €3.6B in 2025 (reflecting 8% growth year-on-year)
- Air (respiratory) - €1.9B, Rare - €906M (22.3% growth), Care (Specialty) - €904M
  - The Rare Diseases unit now accounts for approximately 25% of total Group sales, contributing 50% of overall growth in 2025.
- Annual R&D investment of €885M in 2025
- Experience with data generation/ongoing post-marketing studies to support further uptake

Chiesi Farmaceutici S.p.A.

- Experienced sales team
- Strategic focus on rare diseases
- Specific expertise in Fabry disease
- Ideally suited to bring Elfabrio to patients with Fabry disease

1 – update based on 2025 Annual Report

PROTALIX
Biotherapeutics

Growth strategy

Next phase of the company

Research strategy - leveraging internal strengths to fuel the company's next phase

Proven ability to drive discovery, development, and registration of new drugs

Rare renal disease focus

- ADPKD, Alport, FSGS, others
- Modality agnostic: nucleic acids, peptides, small molecules, etc.

3-year goal

5-7 programs spanning discovery to clinic

Internal development

ProCellEx® platform

Leveraging existing platforms

Expand Applications

Protein therapeutics

Plant cell-based expression

Chemical modification

PEGylation, other

Drug delivery

Exploring new modalities

Business development

- Innovative platform in-licensing
- China dedicated scouting activity
- Opportunistic in-licensing
- Commercial partnership establishment

Protalix delivers innovation from concept to the market

Two commercial products

ELFABRIO® (pegunigalsidase alfa-iwxj)

elelyso™ (taliglucerase alfa) for injection

Three revenue streams

Chiesi

Pfizer

FIOCRUZ Fundação Oswaldo Cruz

Growing pipeline for the company's next phase

- PRX-115 best-in-class potential for uncontrolled gout
- Collaboration and Option Agreements
- Internal research focus – Rare Renal Diseases

Total Revenues	Cash and Shares Outstanding	Debt
USD 53.6 M for 1H 2026	USD 40.7 M (June 30, 2026) 80.6 M shares of common stock*	No Debt / Warrants
